

#### PATENTED HYDROSHIELD TECHNOLOGY™

Our exclusive Hydroshield Technology<sup>™</sup> features fiberglass reinforced door skins, full-length composite stiles, and composite top & bottom rails to prevent water infiltration on all six sides.

**FULL LENGTH COMPOSITE TOP AND BOTTOM RAILS:** Additional non-porous protection keeps water from seeping into the door and helps prevent the build up of mold or mildew.

**FIBERGLASS REINFORCED SKIN:** Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. Our doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel.

**FULL LENGTH COMPOSITE STILES:** All Plastpro fiberglass entry doors feature fully composite stiles to prevent water infiltration into the door's insulation and to ensure warp free, rot free and rust free doors.

**TRIPLE PANE DECORATIVE GLASS:** Our decorative doorlites provide excellent thermal protection while adding beauty and sophistication to your entryway.

**ARCHITECTURALLY CORRECT PROPORTIONS:** Plastpro doors are designed with beautifully detailed panels that are identical to traditional wood door construction to create crisper shadow lines and heightened curb appeal.

**INSULATED CORE:** Our environmentally friendly insulation is 100% CFC-free and provides a high R-value for maximum thermal protection.

**PLASTPRO'S** Modern door line has combined the strength and Durabilty of our Fiberglass Composite Entry System with the elegance and style of today's contemporay designs.
