LAYERED PANEL DOORS

- ▶ Unique layered construction
- ▶ 132 standard designs, plus unlimited design flexibility
- ▶ Integra-Lok™ wood edge for screw holding power
- ▶ 1 year warranty
- ▶ Environmentally friendly
- ▶ Made in the USA

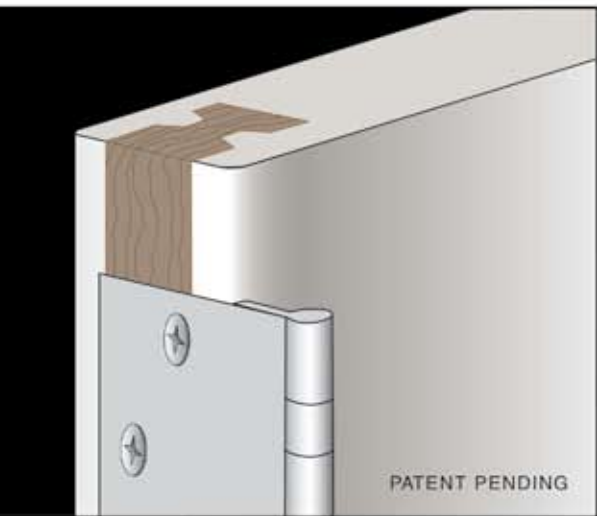

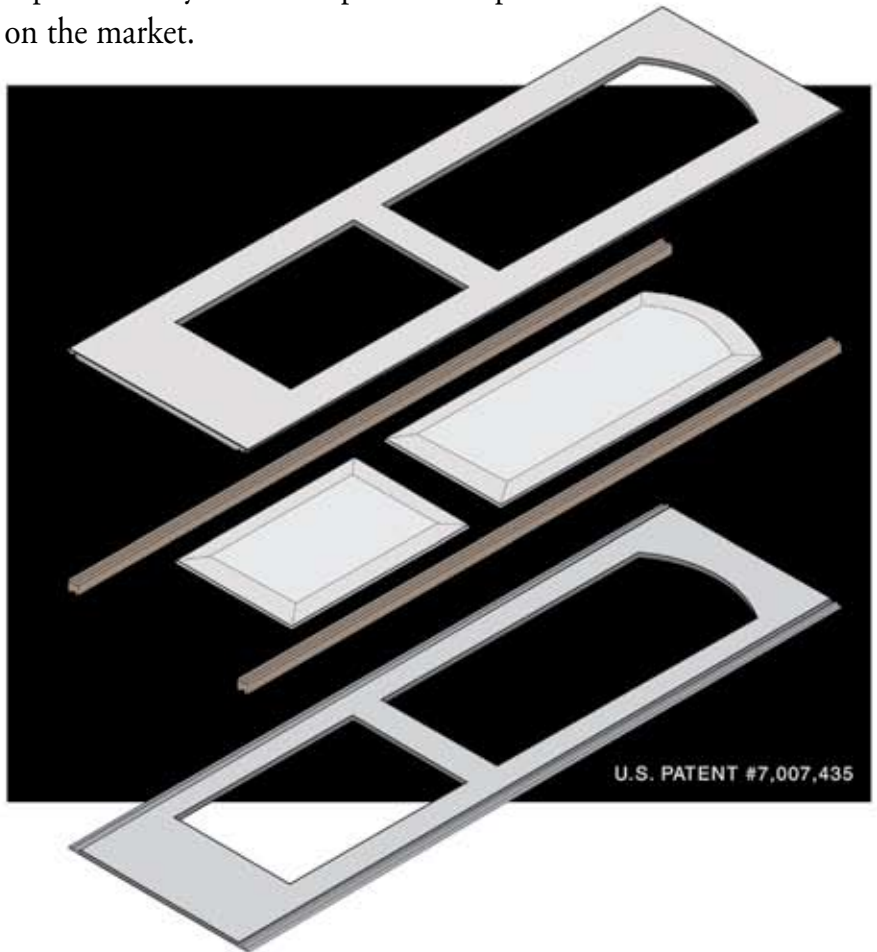

Ovation LAYERED PANEL DOORS

The *Fiberfuse*™ process bonds the pre-machined sheets into a layered composite under extreme pressure. Exterior grade type one glue is utilized for strength and durability. Technology, engineering and craftsmanship come together to make the Ovation Door superior to any other composite door product on the market.

The revolutionary Ovation Door is precision crafted from components made of medium density fiberboard. This stable material is an environmentally friendly substrate that will not split or warp and provides a smooth paintable surface.

Our patent pending *Integra-Lok*™ wood edge is keyed and bonded into the edge of every Ovation Door utilizing our *Fiberfuse*™ process. This unique design feature will not allow the wood edge to pull out and ensures screw holding power. The *Integra-Lok*™ is a unique design element that keeps the Ovation Door rigid and straight. It won't twist and bend like other composite door products. The Ovation Door with its *Integra-Lok*™ wood edge requires no special door hardware or fasteners to install.

Fire Rating

20-minute positive pressure fire rating with 5/8" flat panel and 1-1/4" raised panel, up to 8/0 x 8/0 pairs.

Ovation LAYERED PANEL DOORS

Our computer driven panel shaper creates perfect panels every time

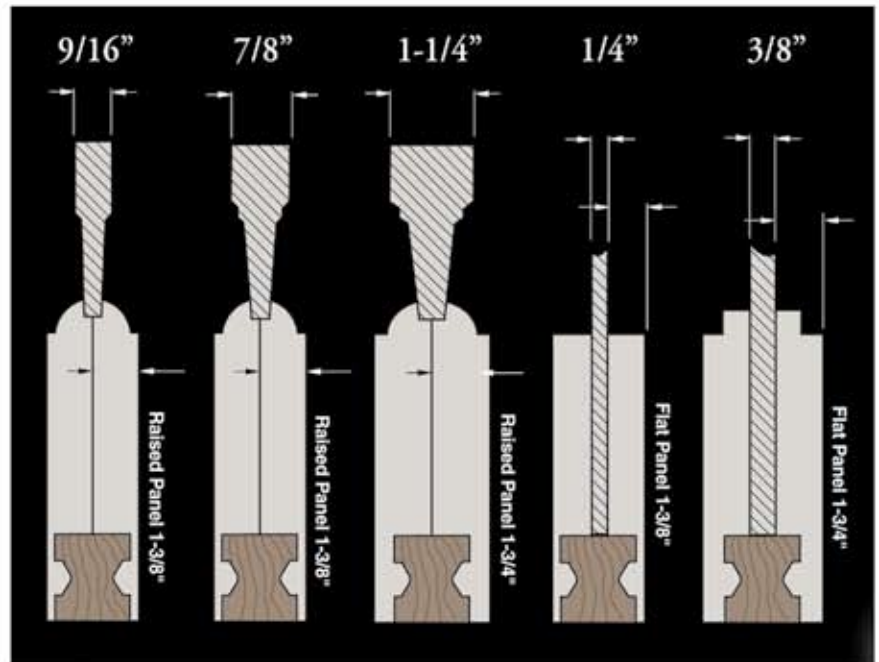

Lead-time

State of the art electronic order entry systems ensure that the order you place this week will go into production this week. Numerically controlled computer routing equipment runs around the clock to insure on time delivery schedules.

Design Versatility

The Ovation Door is offered in a wide variety of styles to fit any architectural requirement.

Over 132 standard designs are available and unlimited custom design flexibility is offered with the Ovation Door. Choose or modify a standard design or create your own unique design. Many of our standard designs began as a custom customer request.
